5. Supervision and Professional Practice Development

Supervision

1. The importance of supervision. Having a sounding board for personal insight and deepening the healer's practice with self and clients.
2. Case studies and support for the practitioner with clients. Insights and deepening the healing vessel. Identifying areas and healings to investigate with the client, blinds spots, opportunity for soul growth, support, asking for help.
3. The self-care for the healer. Balancing healership with personal life.
4. Group Supervision and Individual Supervision

Professional Practice Development

1. The client/healer relationship and states of projection, transference and holding the energy field on a personal self-aware level for both healer and client. The WIE Model. Working with Clients with Personality Disorders. Professional Boundaries—relationships with clients and multiple boundaries and relationships. Deciding when to take on a client, to refer out, or not to work with a person.
2. Setting up a professional practice: Ethics, space/office and hours, treatment forms, budget, fees/trade/barter, insurance, professional memberships, marketing/advertising, practice development-ie. couples counseling, working with teenagers and young adults, specialty clientele, etc.; networking with health care professionals and practitioners (referring to other professionals.) Your vision for creating your profession practice.
